The sawfly genus *Pristiphora*, with about 240 species, is the second largest in the subfamily Nematinae (Tenthredinidae). The genus has a complicated taxonomic history. Frequent changes in species names and the lack of reliable, comprehensive identification keys have hitherto hampered research. In this work we review the North-West Palaearctic species using morphological and genetic data, including altogether 90 species. Two species are described as new and 29 new synonymies proposed. As a result, the number of West Palaearctic species is reduced from 120 to 107. We provide identification keys (a dichotomous and a multi-choice electronic key) that should enable a more reliable identification of most North-West Palaearctic species than was previously possible. Remarkably, genetic data based on mitochondrial DNA proved to be unreliable for identifying roughly half of the species. Much more successful was an approach based on analysis of nuclear DNA. This review is part of an ongoing project, funded by the Swedish Taxonomy Initiative, to improve the taxonomic understanding of nematine sawflies in Fennoscandia and adjacent territories.
The Journal of Hymenoptera Research is published on behalf the International Society of Hymenopterists (www.hymenopterists.org).

ISBN numbers will be assigned to large monographic papers (i.e., major revisions of taxa), monographs, collections of papers, Festschrift volumes, atlases, checklists, prospecti. All content is Open Access distributed under the terms of the Creative Commons Attribution License, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.

Focus and Scope
Journal of Hymenoptera Research publishes papers of high scientific quality reporting comprehensive research on all aspects of Hymenoptera, including biology, behavior, ecology, systematics, taxonomy, genetics, and morphology. Taxonomic papers describing single species are acceptable if the species has economic importance or provides new data on the biology or evolution of the genus or higher taxon. Manuscript length generally should not exceed 50 typed pages; however, no upper limit on length has been set for papers of exceptional quality and importance, including taxonomic monographs at generic or higher level.

Journal of Hymenoptera Research considers the following categories of papers for publication:
* Original research articles,
* Reviews as longer articles, offering a comprehensive overview, historical analysis of a topic, future perspectives of a topic,
* Monographs and collections of papers with no limit in size, published as ‘special issues’,
* Short communications,
* Letters and Discussion papers,
* Book reviews.

The Journal of Hymenoptera Research is published on behalf the International Society of Hymenopterists (www.hymenopterists.org).

AUTHOR GUIDELINES
Authors are kindly requested to submit their manuscript only through the online submission module at http://jhr.pensoft.net/. In case of difficulties with the submission procedure, please contact jhr@pensoft.net. Full text of author guidelines is available at: http://jhr.pensoft.net/about/AuthorGuidelines

EXCEPTS FROM THE GUIDELINES
BooT Text. All papers must be in English, checked by a native English-speaking colleague (if author(s) is/are not nor native English speaker(s)). Write with precision, clarity, and economy, use the active voice and first person whenever appropriate.

Web (HTML) links. Authors may include links to other Internet resources in their article. This is especially encouraged in the reference section. When inserting a reference to a web-page, please include the http/ portion of the address.

CITATIONS WITHIN THE TEXT, Before submitting the manuscript, check each citation in the text against the References to ensure that they match exactly. Delete citations from the list if they are not actually cited in the text of the article. Citations in the text should be formatted as follows: (Smith 1990) or (Smith et al. 1998; Brock and Gunderson 2001; Felt 2006).

REFERENCES. It is crucial to properly format the references, because all references will be linked electronically as much as possible to the papers they cite. For all references, list all authors. You can include a DOI number for the full-text article as an alternative to or in addition to traditional volume and page numbers. Please use the following style for the reference list:

Accepted Papers: Same as above, but “In press” appears instead the page numbers.

CITATIONS OF PUBLIC RESOURCE DATABASES. It is highly recommend-ed all appropriate datasets, images, and information to be deposited in public resources. Please provide the relevant accession numbers (and version numbers, if appropriate). Accession numbers should be provided in parentheses after the entry on first use. Examples of such databases include:

• ZooBank (www.zoobank.org),
• MorphBank (www.morphbank.net),
• Genbank (www.ncbi.nlm.nih.gov/Genbank),
• BarCode (www.boldsystems.org)

Providing accession numbers allows linking to and from established databases and integrates your article with a broader collection of scientific information. Please list all accession numbers directly after the References.

INTERNATIONAL CODE FOR ZOOLOGICAL NOMENCLATURE. The Journal of Hymenoptera Research will publish papers only strictly following the rules of the 4th edition of the International Code of Zoological Nomenclature. Each first mention of an animal species name within the text must be provided with author(s)’ name(s). Year of publication of animal species is recommended to be given in taxonomic revisions with following full referencing of original description in the list of references.

OPEN ACCESS FEES. Publication fees in open access journals ensure a barrier-free distribution of your paper at no charge for the readers and include costs involved in processing, publishing, indexing and archiving your paper.

The journal charges Open Access Publication Fee of EURO 15 per page for papers of less than 100 printed pages. Publication fees for larger papers will be discounted and can be negotiated with the Managing Editor. Open Access Publication Fees are usually covered by institutional funds and grants. Discounts/waivers can be requested by private and retired zoologists, scientists from low- and middle-level income countries, post-graduate students, especially in case of exceptionally good manuscripts.

Discounts will be offered also to scientists who actively participate in the reviewing and editing process.

PRINTED VERSION. Offprints and printed issues of the journal can be purchased additionally (see journal’s website). For standing orders/subscriptions please contact the Managing Editor.
