### Focus and Scope

**Journal of Hymenoptera Research** publishes papers of high scientific quality reporting comprehensive research on all aspects of Hymenoptera, including biology, behavior, ecology, systematics, taxonomy, genetics, and morphology. Taxonomic papers describing single species are acceptable if the species has economic importance or provides new data on the biology or evolution of the genus or higher taxon. Manuscript length generally should not exceed 50 typed pages; however, no upper limit on length has been set for papers of exceptional quality and importance, including taxonomic monographs at generic or higher level.

**Journal of Hymenoptera Research** considers the following categories of papers for publication:

- Original research articles,
- Reviews as longer articles, offering a comprehensive overview, historical analysis or/and future perspectives of a topic,
- Monographs and collection of papers with no limit in size, published as 'special issues',
- Short communications,
- Letters and Discussion papers,
- Book reviews.

**The Journal of Hymenoptera Research** is published on behalf the International Society of Hymenopterists ([www.hymenopterists.org](http://www.hymenopterists.org)).

ISBN numbers will be assigned to large monographic papers (i.e., major revisions of taxa), monographs, collections of papers, Festschrift volumes, atlases, checklists, conspecti.

All content is Open Access distributed under the terms of the *Creative Commons Attribution License*, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.
